

# Digital EUHA Spring Conference

31 March 2023

Dear Sir or Madam,

Next year, the Digital EUHA Spring Conference will kick off on **31 March 2023**. The successful training format is an important date firmly anchored in the calendars of both our members and non-members. We are also expecting numerous international participants.

Lectures and live chats with the speakers will be offered in digital format on the day of the event, and will then be available on demand on the EUHA's learning platform for four weeks. Manufacturer information on new products provided by our advertising partners completes the offer.

The EUHA invites you to contribute to this event, and looks forward to receiving your suggestions for presentations on the topics listed below. Please also state the technical level (basic or advanced).

- **Research & Science**
- **Practical application**
- **Marketing & Communication**
- **Forward-looking topics**

**Please do not hesitate to offer subjects from other fields.**

Practical lectures – by professionals for professionals – are just as welcome as research results or details on new processes and technologies – even if the corresponding studies or results are yet to be completed.

Lectures should be **30 minutes** each. We will record them in advance. This allows us to focus on many different topics that will also be of great interest to our members as on-demand versions.

**Please submit a short abstract stating the author(s), the exact title, and the target group using the following link:**

<https://www.euha.org/en/events/suggestion-for-a-lecture/>

**by no later than 7 December 2022.**

Should you have any questions about the procedure or the content, please feel free to contact us for more information. The EUHA Office is available by telephone on +49 (0) 61 31 – 28 30-0 or by e-mail at [info@euha.org](mailto:info@euha.org).

Kind regards,  
**EUHA e.V.**

**Your community • Your knowledge • Your future**
