

+++ Press release +++

2023 Digital EUHA Spring Conference

(EUHA/Mainz, 14 December 2022) **Save the date! The 3rd Digital EUHA Spring Conference will kick off on 31 March 2023. The successful concept is an important date for further training that is firmly anchored in the calendars of hearing aid acousticians. We also expect numerous international participants this year. For the first time, the event has an international focus and will also be offered in English.**

Lectures and live chats with the speakers will be offered in digital format on the day of the event, and will then be available on demand on the EUHA's learning platform, "EUHA Learning Hub", for eight weeks. Manufacturer information on new products provided by our advertising partners completes the offer.

The EUHA plans to offer 30-minute lectures. This is an ideal new format: for instance, if customer appointments are postponed at short notice, the break can be used for further training.

EUHA President Beate Gromke cordially invites you to position yourself for the future: "Share your knowledge with your customers! Show your expertise and convince customers by implementing up-to-date know-how!"

Presentations from the fields of public health policy, research, practical application, and communication as well as future-oriented topics will be included in the programme. The lectures are offered at "Basic" or "Advanced" levels. This means there will be sessions for every level of knowledge – from trainee to master craftsman.
