Digital EUHA Spring Conference 2025: programme and ticket shop

(Münster, 17 February 2025) **The kick-off for the Digital EUHA Spring Conference 2025 will take place on 28 March 2025. In a new discussion format, Stefanie Fehr-Hoberg and Hannah Wolf will provide information on the topics of 'Coping with stress' and 'Dealing with the current challenges of our time'. These are topics that are currently on everyone's mind.**

The international format of the Digital EUHA Spring Conference is characterised by a high degree of flexibility and can therefore be optimally integrated into everyday working life. The presentations will be available on demand from 28 March until the end of May. This means that the times can be freely planned, e.g. if there are gaps in the operating schedule, this time can be used for further training. High-calibre presentations on specialist topics bring a breath of fresh air into the everyday life of acousticians. Topics from outside the industry have also been deliberately included.

Topics include SNR measurement, audiological services and in-situ measurement, new developments in the field of otoplastics, tinnitus management, ANL and hearing effort. These are just a few keywords that should arouse interest. Programme and tickets at euha.org/en.
