### About Signia

Signia is one of the world's leading brands for hearing aids. With iconic innovations, we are rethinking hearing aids. How they look, how they work, how they sound. Our goal: to inspire and move people. We don't see hearing loss as a limitation. And Signia hearing aids don't just compensate. They enable hearing aid wearers to achieve more than ever before. Not just to be better, but to be brilliant. And to hear brilliantly. Every word, every beat, every breath.

Signia. Be Brilliant.

The information in this document contains general descriptions of technical capabilities that may not always be available in individual cases and may be changed without prior notice. The desired performance characteristics must therefore be specified in each individual case when the contract is concluded.

Motion M IX

## For everyone who loves conversation

Hearing is communication. And communication connects people. But only when we truly understand everyone around us can a sense of togetherness arise.

From the EuroTrak hearing study<sup>1</sup>, we know that understanding is particularly difficult within the family or among friends when many people are speaking at the same time.

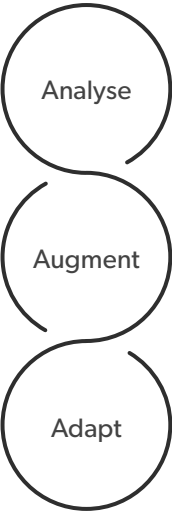

This is exactly where Motion IX comes into its own. 95% of test subjects showed improved performance in group conversation scenario with IX technology and Multi-Beamformer<sup>2</sup>.

# 3 steps to a new sense of togetherness

These hearing aids easily handle multiple speakers at the same time. With their unique Integrated Xperience technology, they turn turbulent chaos into stimulating group conversations.

IX hearing aids detect both the direction and number of people in your conversation. This is made possible by analyzing 192,000 data points per second.

With the multi-beamformer, the hearing aids detect your conversation partners and stay focused on them at all times – even when they are moving.

With around 1,000 updates per second, your hearing aids adapt seamlessly to even the smallest changes.

## The Motion IX family

**Motion Charge&Go M IX**  
Motion Charge&Go M IX is ideal for moderate hearing loss. Smaller than P and SP models, lighter, and more discreet – yet fully rechargeable and offering the complete IX performance for challenging group conversations.

**Motion Charge&Go P IX**  
Motion Charge&Go P IX delivers the power needed for moderate to severe hearing loss, along with convenient rechargeability. Innovative IX technology ensures brilliant conversations – even in noisy environments.

**Motion Charge&Go SP IX**  
Motion Charge&Go SP IX is the perfect solution for severe hearing loss. With super power, an impressive battery life up to 70 hours, and IX technology, it delivers performance and reliability for specific needs.

## Brilliant and comfortable

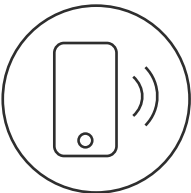

All Motion Charge&Go models can be conveniently charged using one of the matching chargers, eliminating the hassle of changing batteries. The powerful lithium-ion battery keeps you going worry-free, with up to 70 hours of battery life depending on the model.

**Desktop Charger Motion:** The base unit for especially easy insertion into the charging station.

**Dry&Clean Charger Motion:** The all-in-one solution for charging, drying, and disinfecting.

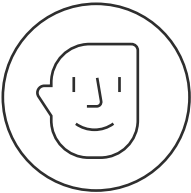

## Our app, Your digital assistant

The Signia app combines a variety of functions in a clear user interface.

With My Well-being, the app provides the functions of an activity tracker. Sensors built into your hearing aids record your everyday activity in the categories of steps, physical activity, wearing time, and conversations.

The integrated Signia Assistant is your 24/7 digital assistant with artificial intelligence, making sound adjustments and other settings for you. It helps you in challenging listening situations.
