

# IX Technology – designed for conversations. Made for everyone. Truly unique.

Integrated Xperience (IX) stands for genuine understanding in group conversations – thanks to market-leading signal processing that is consistently designed to meet the demands of everyday life.

Whether classic or iconic, IX is available in a wide range of designs – and sets new standards through the interplay of a diverse and distinctive features.

## What makes IX unique?

1. Advanced conversation analysis and multi-beamforming ensure every conversation partner is clearly captured
2. Dynamic conversation enhancement (Lehn effect)
3. Enjoy a more natural sound of your own voice thanks to OVP (Own Voice Processing)
4. Rechargeable across all designs, with an impressive battery life of up to 70 hours
5. Easily control all Signia hearing aids, via app and miniPocket
6. Enjoy 24/7 sound enhancement with the Ai-powered digital Signia Assistant
7. Full custom ITE designs, from standard models, to extra-small CICs with rechargeable batteries
8. Instant Fit IdOs Silk Charge&Go: rechargeable in-ear hearing aids that require impressions
9. Active Pro: cutting-edge earbud hearing aids with rechargeable battery, Bluetooth connectivity, and multi-beamformer technology
10. Discover Styletto: designer hearing aids fully equipped with cutting-edge technology and elegant style

The greatest conversation ever  
IX in every design. For every budget.  
For every requirement.
