

PRESS RELEASE **- 12 OCTOBER 2026**

ECHODIA presents flexible, multi-measure diagnostic solutions at EUHA 2026

ECHODIA, a french company, will be exhibiting at EUHA 2026 in Hannover, where visitors can discover the ELIOS all-in-one medical device and its range of measurement capabilities for hearing and ENT-related assessment workflows. ELIOS combines audiometry, otoacoustic emissions (OAE) and auditory evoked potentials, including ABR in one system. It also features exclusive market measurements such as Shift-OAE and DPMC, which can support the assessment of Ménière's disease.

Its measurement architecture is designed to adapt to the profesionals work context while maintaining a practical, reliable and portable setup.

Suitable for ENT, maternity, school screening and professional environment, ELIOS can be used as a portable device or connected to a computer, with software included.

Come meet the ECHODIA team at **Hall 006**, **Booth 408** to discover the full product range and its customisable options.
