September 2026

Noah ES Milestone: Now over 8000 users worldwide

HIMSA is proud to announce that in the last five months, the number of Noah ES users has once again increased, this time by almost fifty percent!

This means that Noah ES currently boasts over 8000 subscribers worldwide in the USA, Canada, Europe, Australia and New Zealand!

“2026 has been a fantastic year for Noah ES,” states Anders Nielsen, HIMSA Product Manager. “In the first nine months of 2026 alone, Noah ES user subscriptions have taken off, doubling from 4000 to 8000 users.”

As word spreads of the ease and benefits of Noah ES, more hearing care businesses are making the switch from Noah System to Noah ES.

“We have experienced a rapidly growing interest from HCBs for Noah ES,” states Nielsen, both through our website and at the conferences we attend.”

The most popular features are anytime, anywhere access, as well as instant networking for all employees in all offices with a single Noah patient database.

Noah ES also relieves the burden of database maintenance, such as database backups, and helps ensure that patient data is stored, backed up and protected in line with your countries regulations.

Seven HIMSA member companies have also chosen to integrate and certify their Practice Management Systems with Noah ES, giving you more Noah ES options to choose from.

Visit the HIMSA website and see why Noah ES really is that easy. You can even sign up for a free 30-day trial!
