Press release EUHA - Schick GmbH

Schick presents stationary and battery-operated milling machines, an extraction box, and workplace lighting – Made in Germany.

Schemmerhofen / Hanover, Germany in October 2026

Schick GmbH, one of the world's leading manufacturers of **milling machines**, will be represented at the EUHA for the ninth time. The family-run, medium-sized company from southern Germany attaches great importance to quality and offers comprehensive service with personal contact partners. In addition to the milling machines, Schick GmbH will also be presenting **illuminated protective screens** (L Protect) and the **Absorberbox XL**.

'Anyone who opts for our **Q3 milling machine** is buying a milling machine for life,' explains Ulrike Brehm, customer advisor at Schick. Even the Q3 Basic offers an outstanding price-performance ratio and fulfils all the requirements of hearing care professionals: with a speed range of 200 to 40,000 revolutions per minute, a torque of 7 Ncm, clockwise and anti-clockwise rotation without speed limitation, cruise control function and an OLED display that is very easy to read from all angles, nothing is left to be desired.

Customers also have a choice of four handpiece types, all of which are equipped with brushless motors. Schick offers the **battery-powered 'Q Mobile' model** for **mobile use**.

All Schick milling machines come with an one-year guarantee, which even covers wearing parts, and a five-year guarantee on the electric motor.

Since its market launch, the **Absorberbox XL**, which Schick manufactures exclusively for eccola GmbH and is available via their website (www.eccola.de), has enjoyed great popularity. Workpieces can be comfortably processed in its spacious interior; while sanding particles, dust and vapors are collected by the integrated extraction system. All-round LEDs ensure shadow-free illumination.

By the way: Interested parties who would like to convince themselves of the high quality of Schick milling machines can order them directly from Schick GmbH for a **non-binding trial** (free of charge in Germany and Austria).
