WIDEX ALLURE™

ALLURE AI RIC R D FEATURE GUIDE

PRECISION HEARING TECHNOLOGY		440	330
Allure PureSound™	Ultrafast sound processing that removes delay-based distortion for the most pure and personal sound for open fittings.	■	■
Speech Enhancer Pro	Reduces noise and enhances speech in real time in response to individual sound situations and hearing loss.	•••••	•••••
Dynamic Feedback Controller	Fast and efficient detection and cancellation of feedback, engineered to adapt and preserve sound quality without artifacts.	■	■
Sound Class Categories	Hearing aids adapt automatically to different listening situations for clarity, comfort, and audibility.	11	8
Dedicated Streaming Compressor	Improved sound quality of streamed sound, made possible by a separate streaming compressor.	■	■

KEY FEATURES		440	330
Processing Channels / Fine Tuning Handles	Number of channels/handles for a more precise sound experience and speech intelligibility.	15	12
HD Locator bands	For better speech intelligibility in noise with channel-specific directionality for speech emphasis.	15	12
Listening program options	Select the listening program for optimum audibility, speech intelligibility, and comfort in different listening situations. Maximum allowed programs:	5	4
PureSound	Delivers the most natural, distortion-free sound with ultra-low delay, ideal for open fittings and first-time wearers.	■	■
Clarity Boost	This program activates an additional DNN co-processor for added support in difficult listening situations with noise.	■	■
Music	Optimized for clear vocals and bass richness while listening to music.	■	■
Comfort	Designed for optimum comfort in both noisy and quiet environments when speech is not essential.	■	■
Telecoil	Users can wirelessly connect to hearing loop systems in public settings like theaters and concert halls.	■	■
Zen	Offers personalized sound stimulation through fractal tones, nature sounds, shaped noise, and combination programs to support tinnitus relief and relaxation.	■	■
Soft-level noise reduction	Unwanted background noise is reduced for greater listening comfort.	•••••	•••••
SmartWind Manager™	Improves comfort and preserves speech understanding in windy situations, while preserving binaural hearing.	•••••	•••••
Trusound Softener-Modes	Preserves comfort for sudden sounds at any input level by taking the edge off impact/impulse sounds.	•••••	•••••
Digital Pinna	Helps locate and focus naturally on the voice in front or behind by mimicking the normal pinna effect.	■	■
TruAcoustics™	Customization for the user's ear canal for a more accurate and improved sound quality for all ear-tips.	■	■
Variable speed compression	Compression adjusts dynamically from fast to slow for consistent speech understanding and listening comfort at all input levels.	■	■
True Input Technology	Supports speech intelligibility and sound quality in every situation due to an expanded input range of 113 dB SPL.	■	■

SOUND LIKE NO OTHER

CONNECTIVITY & CONTROL		440	330
Direct Audio Streaming	Direct streaming of audio from iPhones and Android smartphones supporting ASHA and LE Audio. Full compatibility list may be found at https://www.widex.com/en/support/compatibility/	■	■
Hands-free Communication	The microphone of the hearing aid is used to pick up the user's voice for phone calls . Available for compatible iPhones and smartphones using LE Audio.	■	■
Call Control	Answer and end phone calls from a compatible smartphone using the hearing aid push button or with a double tap to the device or ear.	■	■
Widex Allure App	Redesigned app with a clear, intuitive workflow and enhanced accessibility functions.	■	■
AI Sound Assistant	Machine learning algorithm to effortlessly guide wearers to a better, more personalized hearing experience.	■	■
AI Quick Assistant	AI-driven analysis provides real-time recommendations for personalized settings in seconds.	■	■
Streaming Mode Selection	Customize the sound quality for streamed signals by selecting between the Speech Profile or Music Profile.	■	■
Find my hearing aids	Display a map with the GPS location of your hearing aids.	■	■
Personalized Programs	Save your hearing aid adjustments using our AI tools or sound equalizer as easily accessible personalized programs.	5	5
Directional Focus	Adjust the directional focus of the hearing aid microphones manually.	••••••	••••••
Telecoil	Connect easily to Telecoil enabled systems. Additional listening program required.	■	■
Widex TV PLAY 2	Direct stereo streaming of TV to hearing aids. Excellent sound and discreet design.	■	■
RC-DEX	A simple remote for volume and program adjustment.	■	■
SmartSpeak/ SmartTone	Adjustable acoustic indicators to inform the wearer of changes to the hearing aid, including changes to volume control, program setting and low battery warning.	■	■
Push Button	Programmable button to control hearing aid functions with a short or long press.	■	■
LED Indicator	Easily see power, battery and Bluetooth connection status of the device.	■	■
